Patent applications: Liquid formulations with high concentrations of human growth hormone (HGH), containing 1,2-propylene glycol/ glycine / phenol

Dear Frau Colovic,

Thank you for sending the declarations of assignment. It give me great pleasure to see that my inventions will be put to commercial use.

I have in my possession three sets of documents:

- One dated 6th August 2003, already signed by John Stevens, in respect of patent applications BP/G-32574P1; BP/G-32575P1 and BP/G-32576P1;
- one dated 10th December 2004, in respect of patent applications BP/G-32575A/BCK and BP/G-32576A/BCK (National Phase PCT/EP03/07349 and PCT/EP03/07346); and
- one dated 14th December 2004 in respect of patent application BP/G-32574BCK (National Phase PCT/EP03/07347).

In all the letters, I am requested to sign the said documents and thereby surrender to Sandoz AG all my rights in connection with these inventions.

In addition, there is my letter to Mr. Thomas Lehmeier of 1st September 2003, to which I have not yet received a reply.

In my letter, I pointed out *inter alia* §§ 7 to 17 of patent law, in which the Austrian legislation on the technical area of the patent relates expressly to the so-called service invention. When weighing up the interests between the employer and the employee inventor in the commercial evaluation of his invention, patent law operates on the principle that the result of work, in other words the invention of the employee, is not to be assigned for a fee to the employer, but a differential treatment regulation applies.

In any case, the employee is entitled to an appropriate special remuneration in accordance with § 8 para. 1 of patent law, because according to regulations the employee's salary does not count as compensation for inventive activity. The rights of the employee from the invention are unilaterally absolute in his favour according to § 17 of patent law, and remain in force even after termination of employment according to § 16 of patent law.

I'd like to ask you again to explain the facts from your point of view, especially in respect of an appropriate remuneration, since all your correspondence on this point has been very recitent in this respect (we do hereby sell and assign to Sandoz... all our right, title and interest...).

You will understand that I shall let you have the signed documents only after we have reached an agreement.

Yours sincerely,

Dr. Michael Betz

Patent application

Dear Dr. Betz,

We have been told by the Novartis Corporate Intellectual Property Department in Basel that you have not yet signed the documents for filing a patent application for certain liquid formulations with high concentrations of human growth hormone.

At this point, we would politely request you to do so by return. Regarding the claim for reimbursement which you have put forward, we would like to remind you of the two conditions for this:

1. Existence of patentability, established by grant of patent
2. a commercial act of use by the (former) employer.

Neither exists at present; in particular, we do not envisage when commercialisation will take place. When the conditions apply, we will examine any claims you may have for reimbursement in accordance with the provisions of patent law.

Furthermore, we would point out that Sandoz reserves the right to legally enforce if necessary any additional costs incurred by your refusal to sign the afore-mentioned documents. If the non-signing should also result in the loss of a patent application, Sandoz will present you with a statement of claim for damages - after appropriate verification. We presume that it will not come to this, and request your co-operation. Thank you!

Yours sincerely

Sandoz GmbH
